BRACELET SIZE

MOMENTS SILVER CHARM BRACELET

- The most popular bracelet size is 19 cm.
- A bracelet is perfectly sized when you measure your wrist tightly and add 2 cm.
- If you are between sizes ask yourself how you like to wear your bracelet. If you wear it tightly choose the smaller size and if you like to wear it loosely take the next size up.
- Please be aware that when you receive a new bracelet it will feel stiff, which can make it seem uncomfortably tight. The bracelet will quickly soften and become more flexible as you wear it.
- If you wear your bracelet often then it will grow about 1 cm over the first year. This timeframe will depend on how often you wear it and how many charms you have on your bracelet.
- After one year the bracelet might still grow slightly but not much.
- Please be aware that charms do not take up as much space as you think so to get the best use of your bracelet you should follow our guidelines.
- If you start off with just a few charms your bracelet might seem loose in the beginning. This will change as you add more charms.
- You can also measure a bracelet you already have. You should measure end to end for the correct size. Please bear in mind that if you have had your bracelet for a while (1 year+) it has possibly grown 1 cm.
